☐ Plugging and Abandonment☐ Class III☐ Report After Work☐ Conversion to a Non-Injection Well☐ Class V

Date Work Ended

Provide a narrative description of the work planned to be performed, or that was performed. Use additional pages as necessary. See instructions.

The purpose of this rework is to improve the integrity and extend the longevity of the asset. Having experienced several packer-seal issues, it has been determined that either the weight or the quality of the 7" casing is not conducive to achieving the necessary annular isolation. The plan is to run 4½" casing and cement it to surface using a cement staging tool or an inflatable packer cement tool. The 4½" casing will become the monitored annular space and the injection string will be 2⅞" tubing on a WOS AS1-X 2⅞" X 4½" packer.

## Certification

I certify under the penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment. (Ref. 40 CFR § 144.32)
